Full Stack Developer | TypeScript · React · Angular · Node.js

Full Stack Developer with hands-on experience building React/TypeScript applications and full-stack systems using Node.js, NestJS, REST APIs, and relational databases. Comfortable working across the frontend/backend boundary, from component architecture and state management to API design, authentication, and automated testing. Technical scope also includes Angular, microfrontend architecture, CI/CD pipelines, cloud infrastructure (AWS, Terraform), and AI-assisted engineering workflows with Claude Code.

Technical Skills

- **Frontend:** TypeScript, JavaScript, React, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Zustand, React Hook Form, Zod, D3.js
- **Frontend Architecture:** Microfrontends, Module Federation, Component Architecture, Shared Frontend Architecture, Responsive Design
- **Backend:** Node.js, Express, NestJS, REST APIs, JWT Authentication, Prisma, PostgreSQL, MongoDB
- **Testing:** Playwright, Jest, Vitest, React Testing Library, E2E Testing, Unit Testing
- **DevOps & CI/CD:** Git, GitHub, GitLab, GitLab CI/CD, CI/CD Pipelines
- **Cloud & Infrastructure:** AWS, AWS Lambda, AWS KMS, Terraform, Infrastructure as Code
- **AI-Assisted Engineering:** Claude Code, CLAUDE.md, Skills / Instructions, Code Analysis, Debugging, Refactoring, Test Generation, Code Review

Professional Experience

- **Sipma** **Barcelona, Spain**
2025–Present
Full Stack Developer
 - Developed features within a SaaS platform application (built on Bubble, extended with custom JavaScript, HTML and CSS) supporting core business workflows
 - Designed and built an interactive Gantt chart with D3.js, implementing task dependency management and critical path calculation and rendering
 - Refactored an approximately 20,000-line codebase into a modular, maintainable architecture
 - Worked directly with the Team Leader to define and resolve technical and functional requirements, communicating progress and technical solutions
 - Delivered work under Scrum within a cross-functional team
- **Musila** 2025
Full Stack Developer (Internship)
 - Built frontend features for a persistent music player platform with React, Next.js and TypeScript, including genre browsing, song publishing, and song-usage request workflows
 - Implemented global state management with Zustand, reducing prop drilling and simplifying complex data flows
 - Built forms and validation with React Hook Form and Zod, improving data integrity and UX consistency

- **Henry Bootcamp** **Barcelona, Spain**
2025
Full Stack Teaching Assistant
 - Provided technical mentorship in JavaScript and React fundamentals to bootcamp students
 - Led code review sessions and debugging support to ensure code quality

Selected Projects

- **Personal Finance Platform**
My-Balance
 - Built a full-stack personal finance platform (Next.js/React/TypeScript frontend, NestJS/Prisma/PostgreSQL backend) covering a financial dashboard, income and expense tracking, payroll records, bank import, savings, debt tracking, and reporting with financial projections
 - Implemented REST APIs with JWT authentication over httpOnly cookies, backend validation, and authorization checks
 - Built a reusable, component-based, mobile-first UI with Zustand for state management and React Hook Form with Zod for form validation
 - Built and maintained automated unit and E2E test suites across frontend and backend, using Jest for backend testing and Vitest for frontend testing, with regression validation integrated into the development workflow
 - Integrated Claude Code into engineering workflows for codebase analysis, technical planning, debugging, refactoring, code review, and test generation, validating changes through tests, linting, type-checking, and builds
- **Restaurant SaaS Platform**
SmartQR
 - Built a multi-role restaurant SaaS platform (Next.js/React/TypeScript, NestJS/PostgreSQL) with role-based interfaces for SuperAdmin, Owner, and Staff, protected routes, and QR-code-based table ordering
 - Integrated third-party services, including Auth0 for authentication, Stripe for payments, Socket.io for real-time order updates, and Mapbox for location features, alongside order management and reporting dashboards

Education

- **Henry Bootcamp** **Barcelona, Spain**
2025
Full Stack Web Developer
Intensive full-stack training: JavaScript, React and Node.js.

Professional Development

- **Angular Specialization**, Udemy (in progress).
- **Intensive Technical Development Program**: Microfrontend Architecture, Module Federation, Playwright, GitLab CI/CD, AWS Lambda, AWS KMS and Terraform.

Languages

- Spanish (native), English (B2 - Intermediate).
